

How to push the TeachingBooks Chrome Extension via Google Admin Console

Chrome Extension Name: TeachingBooks Book Connections

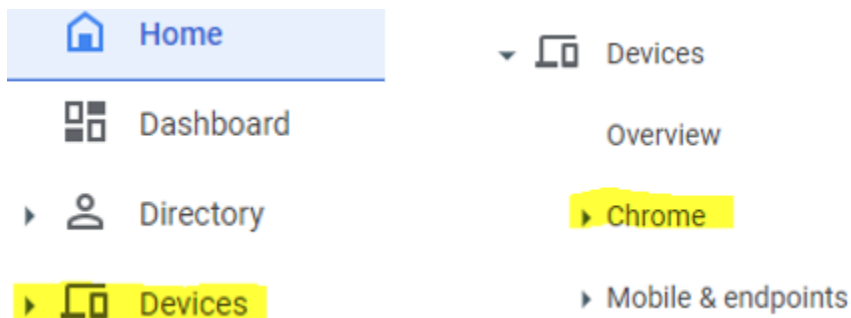

Chrome ID #: olanjgcmnnbjegobokcbfkggbgmadpim

Regarding student privacy: please know that TeachingBooks does not know nor track any data from Google Chrome Extension searches.

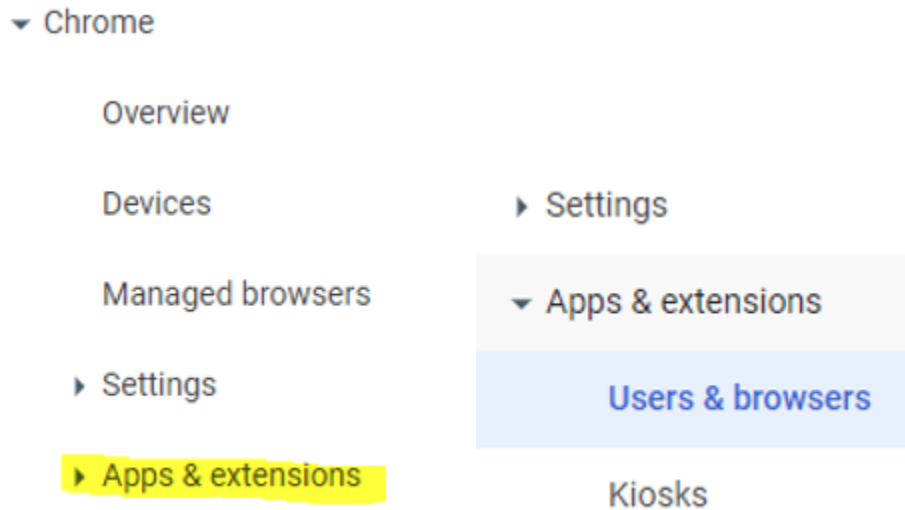

Steps to deploy the TeachingBooks Chrome Extension via the Google Admin Console

1. Login to Google Admin Console

a. Select “Devices” from left Menu & “Chrome” from device list

b. Select “Apps & Extensions” from Chrome List & “Users & Browsers” from Apps list

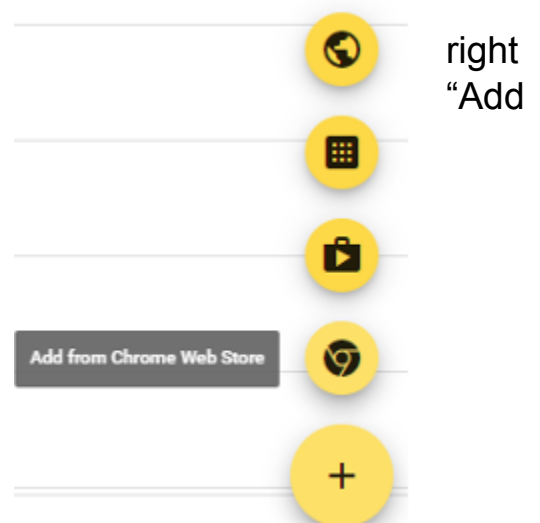

c. In the Users/Browsers window:

C1. In left pane, choose the Root organization or OU desired to receive access to TeachingBooks

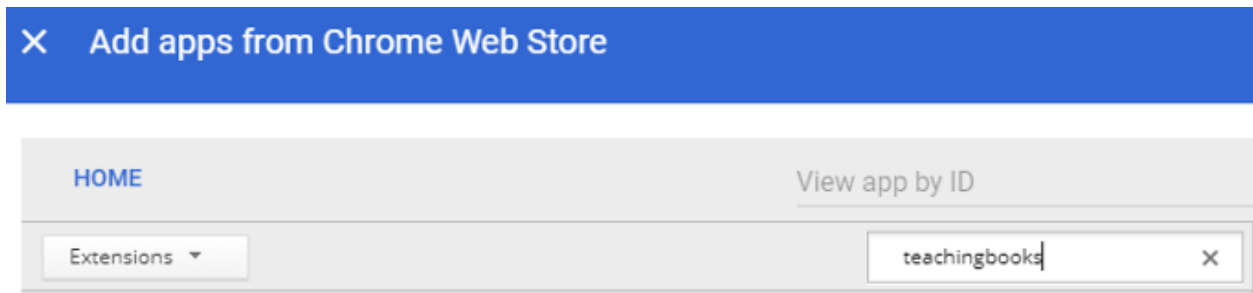

C2. Click on the Yellow plus sign bottom to bring up source options – select the “Add from Chrome Web Store” option

The “Add apps from Chrome Web Store” window will appear.

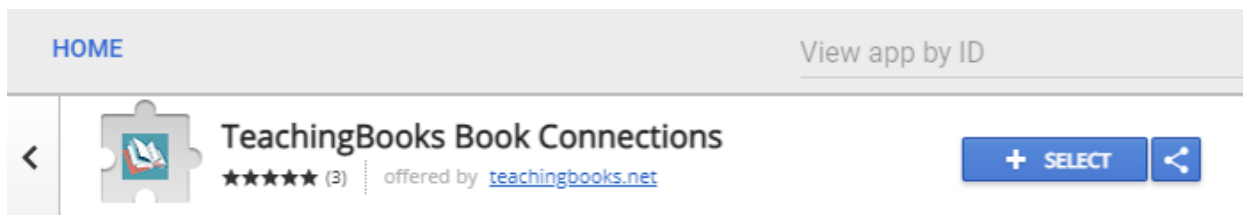

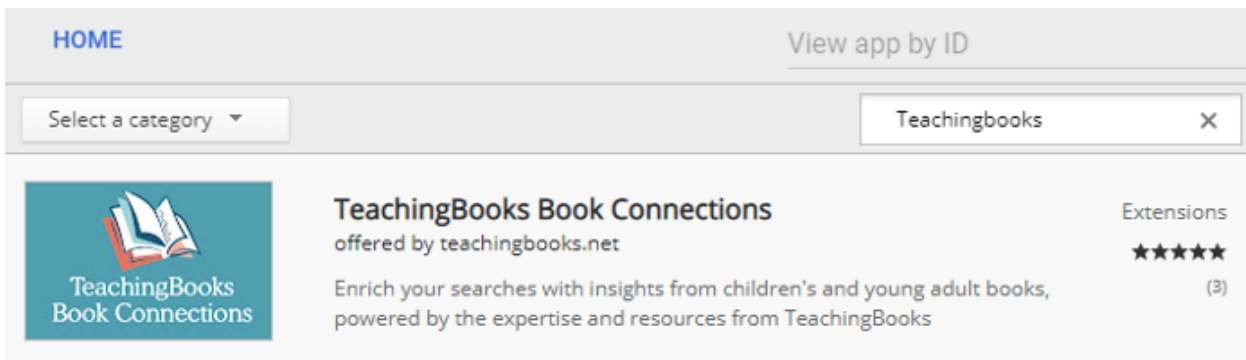

d. Ensure “Extensions” is chosen & enter “TeachingBooks” in the search store/Enter. If needed, id = olanjgcmmbjeogbokcbfkggbgmadpim

D1. TeachingBooks Book Connections will appear – click on the extension & click “Select” to add

e. **Add to District Store Collection & Allow Install as shown below / click SAVE**

You can also chose “force install” verses “allow install” to push to everyone

The screenshot shows the Google Admin Console interface for managing Chrome Web Store apps. The 'Users & browsers' tab is active. The app 'TeachingBooks Book Connections' is selected, and its settings are displayed on the right. The 'Include in Chrome Web Store collection' toggle is turned on. The installation policy is set to 'Allow install'. The app is listed as 'Locally added'.

App	Installation policy
TeachingBooks Book Connections olanjgcmmnbjeogbokcbfkggbgmadpim	Allow install Locally added

The close-up shows the app list with a context menu open over the 'TeachingBooks Book Connections' app. The menu options are:

- Force install + pin to browser toolbar
- Force install
- Allow install
- Block
